

PARTNERS AND ALLIANCES

AppCentral enjoys strategic partnerships with many global IT companies including Microsoft, HP, Citrix, Sun, Salesforce.com, Adobe, WebEx, Autodesk, Computer Associates, Trend Micro, Wyse, Pay By Touch, Intuit and Insight.

AppCentral™ Solutions Overview

Cost Effective, Fast, Secure and Reliable:

AppCentral Inc. is the world's first on-demand computing company delivering leading business applications and IT solutions for small and medium-sized businesses as a simple, subscribe-and-use utility.

AppCentral Solutions are delivered with **Triple Secure™** remote access and reliability at significant savings. No servers to buy, no software to maintain, relieving companies of the inherent infrastructure and support resources required for business effectiveness and success. All without compromising speed of access, system reliability or individual productivity.

AppCentral Overview:

AppCentral provides an enterprise-class computing platform: founded upon world class infrastructure built through innovative design, Triple Secure technology and market leading partners supporting both Windows and Macintosh platforms

- **Fault tolerant, secure data back-up and storage:** AppCentral backs up your data every 12 hours with 30-day data retention.
- **Remote Access:** Files are stored securely and encrypted on our servers so that you can access your desktop from any device with an internet connection – anywhere, anytime.
- **Desktop synchronization:** Enables you to automatically manage files off-line between the UtilIT application portal and local device.
- **Application portal software package:** AppCentral's solutions are designed to meet your productivity needs. Plus you can add applications from our software library as your needs expand.
- **Virtual LAN (VLAN):** AppCentral's virtual local area network (VLAN) allows users and user groups to easily share and transfer files securely through UtilIT's network. The virtual LAN creates an easy to use communication system between offices, locations and users and significantly reduces dependence on wide area networks (WAN).
- **Expert Support:** In the rare event that you should require support, our certified professionals are available on-line 24/7 or by phone during business hours.

For businesses that require higher levels of functionality and service, AppCentral delivers premium products and services like integrated telephony, additional software applications, data storage and extended support.

AppCentral Solutions:

AppCentral Enterprise Solution is our most popular small and medium-sized business package and includes:
